

# Eastern Garage Doors – How to Program Your VR55S Remote

## **Before You Start:**

- Remove any plastic cover from the motor's control panel to access the buttons.
- Ensure your VR55S remote has a fresh CR2032 3V battery installed.

## **Activate the Remote:**

- Within 30 seconds, press and hold the desired button on your VR55S remote.
- Hold the button until the motor's LED indicator turns off and then remains on.

## **Confirm Programming:**

- Press the programmed button on your VR55S remote.
- The motor's LED indicator should flash once, confirming successful programming.
