

# Eastern Garage Doors – Programming Instructions

## Boss HT3 Genuine Remote

1. Remove the motor's faceplate to access the Radio Set button. This button is usually yellow, though the colour may vary depending on your motor model.
2. Press the Radio Set button once and release. A light will appear on the motor to indicate it's in programming mode.
3. On your new remote, press and hold the desired button until the light on the motor switches off.
4. Your remote is now programmed. Test it by pressing the button to confirm the door operates correctly
